

ASSIGNMENT 13

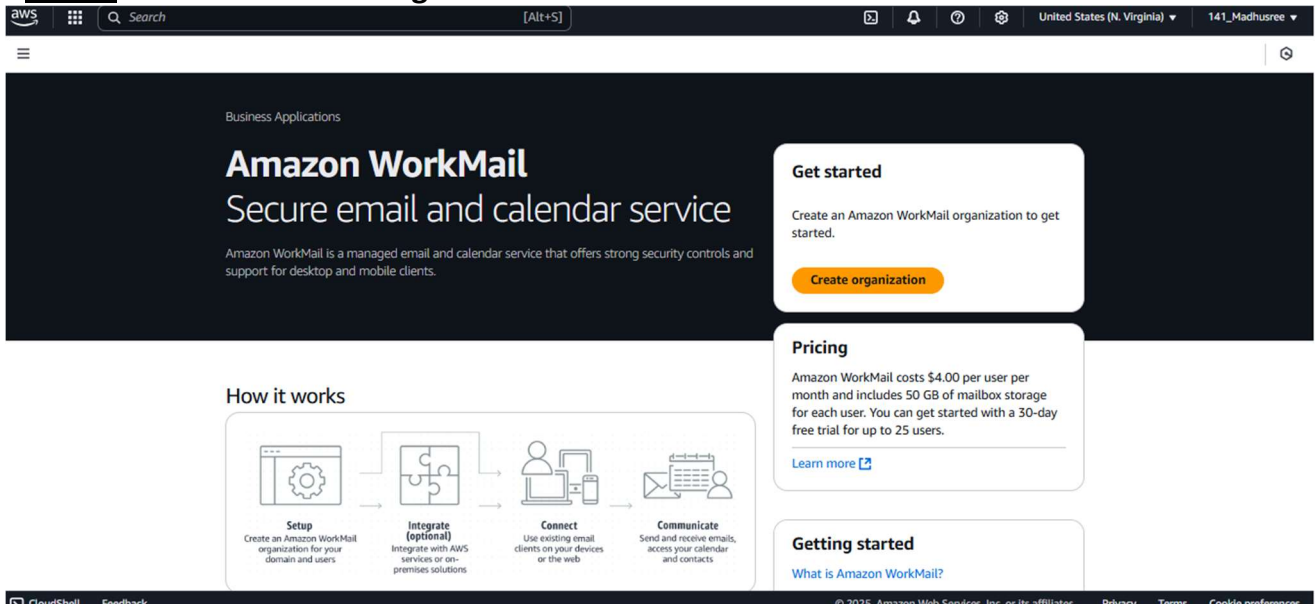

PROBLEM STATEMENT:

Create a workmail for your organization.

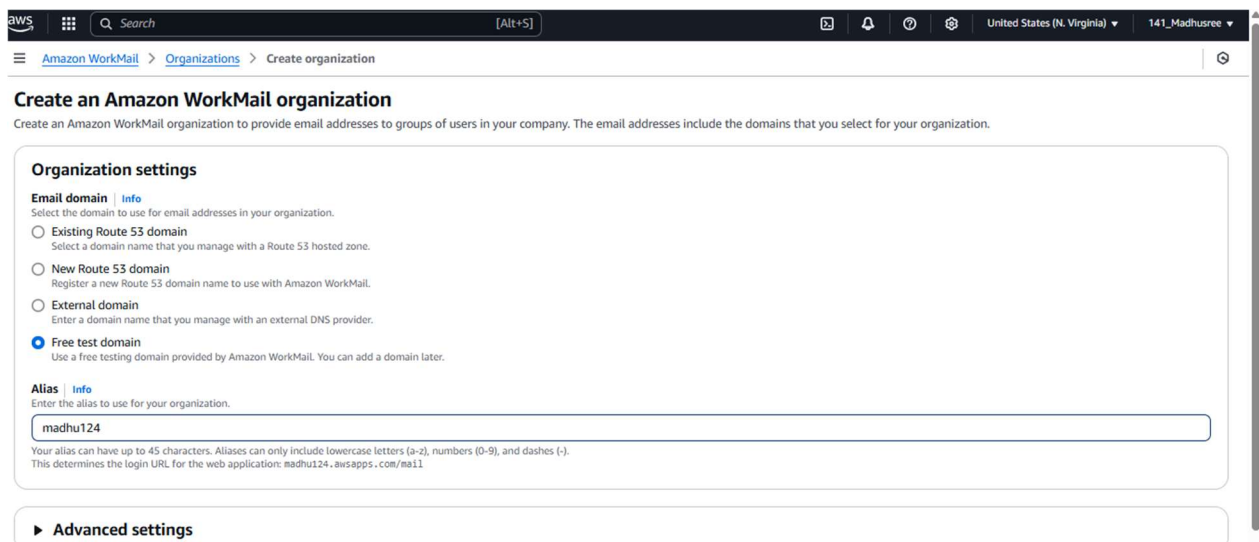

STEP 1-> Search for “Amazon Work Mail” in the search bar & open it.

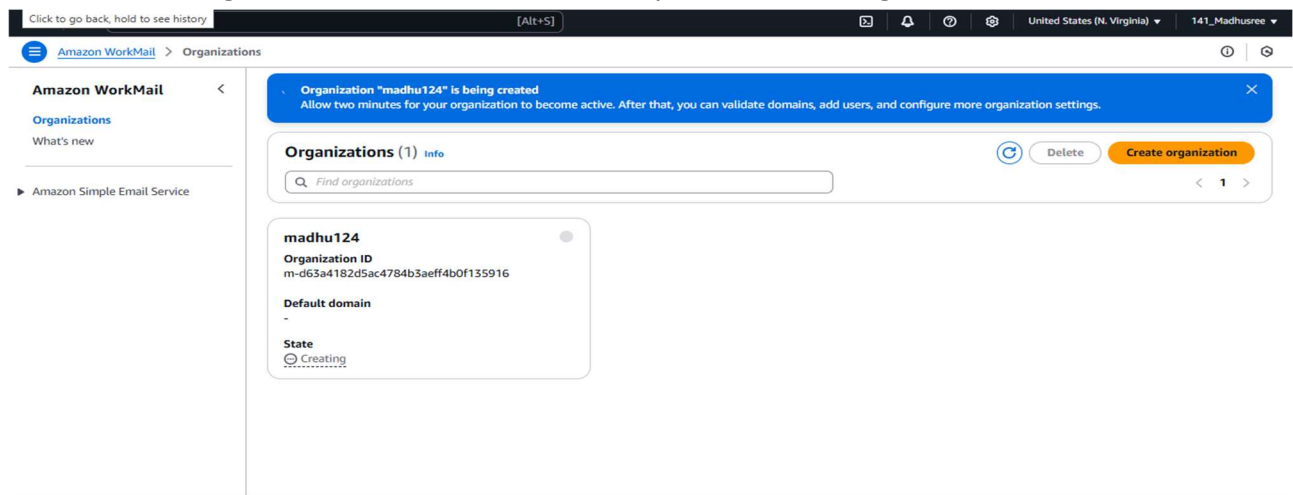

STEP 2-> Click on “Create Organization”.

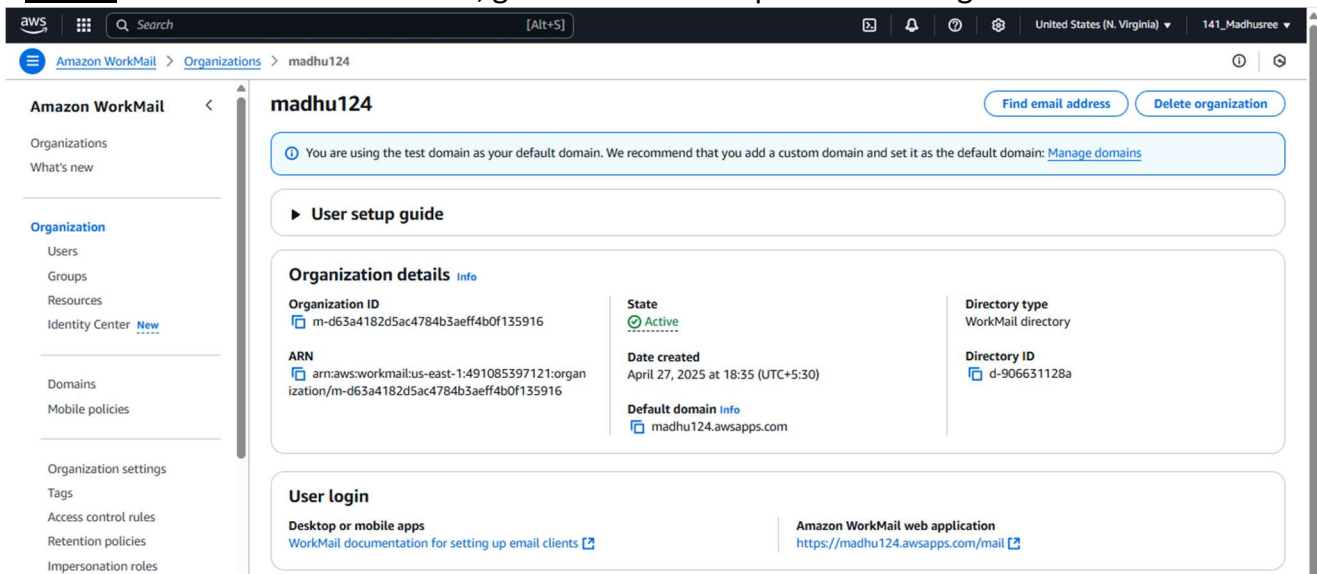

STEP 3-> Under Organization settings select “Free Test Domain”. Give the organization name under alias. Then click on “Create Organization”.

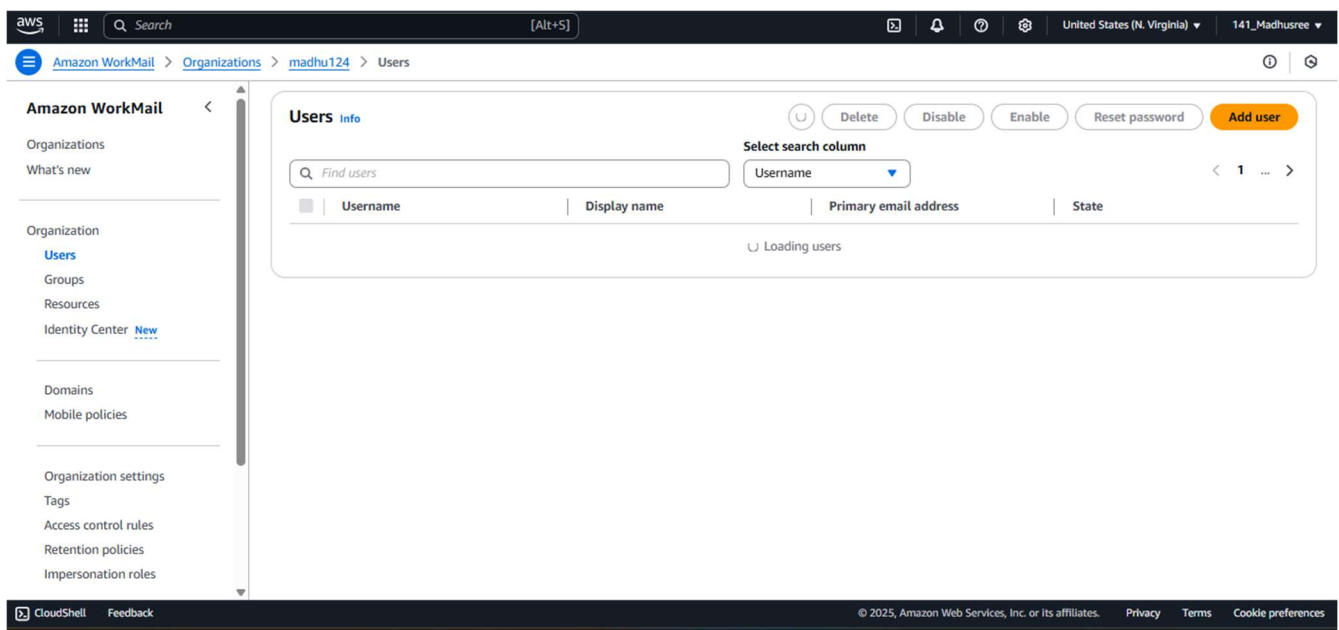

STEP 4- The organization is created successfully. Click on the organization name to enter into it.

STEP 5- From the left side menu, go to the “Users” option under Organization.

STEP 6- Click on “Add User” button.

STEP 7-> Fill basic user details.

The screenshot shows the 'Add user' page in the AWS Management Console. The breadcrumb trail is 'Amazon WorkMail > Organizations > madhu124 > Users > Add user'. The page title is 'Add a user' with an 'Info' link. Below the title is the instruction 'Add a user to your Amazon WorkMail organization.' The 'User details' section contains the following fields:

- Username:** A text input field containing 'madhu'. Below it, a note states: 'The username enables the user to login to the Amazon WorkMail webmail. Username can only contain the following characters: a-z, A-Z, 0-9, _ (underscore) - (hyphen) and . (dot); or it has to be a valid email address.'
- First name - optional:** A text input field containing 'Madhusree Kar'.
- Last name - optional:** An empty text input field.
- Display name:** A text input field containing 'Madhusree Kar'. Below it, a note states: 'The name by which the user is presented in the system.'
- Email address:** A text input field containing 'madhu' followed by a dropdown menu showing 'madhu124.awsapps.com'.

STEP 8-> Set up a password. Then click on "Add User".

This screenshot shows the 'Add user' page with the 'Password setup' section expanded. The 'Display name' field contains 'Madhusree Kar' and the 'Email address' field contains 'madhu@madhu124.awsapps.com'. The 'Advanced - optional' section is collapsed. The 'Password setup' section includes:

- Password:** A text input field with masked characters (dots). Below it, a note states: 'Password for the user to log in with. Passwords have an 8-character minimum with at least one character from three of these four categories: lowercase, uppercase, numeric, and special characters.'
- Repeat password:** A text input field with masked characters (dots).

At the bottom right of the form are 'Cancel' and 'Add user' buttons.

STEP 9-> The user is successfully created. Now, go back enter into Organization.

The screenshot shows the 'Users' page in the AWS Management Console. The breadcrumb trail is 'Amazon WorkMail > Organizations > madhu124 > Users'. A green success message at the top reads 'Successfully added Madhusree Kar.' The 'Users (1)' section has an 'Info' link and buttons for 'Delete', 'Disable', 'Enable', 'Reset password', and 'Add user'. Below these is a search bar with the text 'Find users' and a 'Select search column' dropdown set to 'Username'. A table lists the user:

	Username	Display name	Primary email address	State
☐	madhu	Madhusree Kar	madhu@madhu124.awsapps.com	Enabled

The left sidebar shows the 'Amazon WorkMail' navigation menu with options like 'Organizations', 'What's new', 'Organization', 'Users', 'Groups', 'Resources', 'Identity Center', 'Domains', 'Mobile policies', 'Organization settings', 'Tags', 'Access control rules', 'Retention policies', and 'Impersonation roles'.

STEP 10-> From the bottom of the screen, click on the “Amazon WorkMail Web Application” link.

The screenshot shows the Amazon WorkMail console for the organization 'madhu124'. The left sidebar contains navigation links for Organizations, What's new, Organization (Users, Groups, Resources, Identity Center), Domains, Mobile policies, Organization settings, Tags, Access control rules, Retention policies, and Impersonation roles. The main content area displays organization details:

- Organization ID:** m-d63a4182d5ac4784b3aeff4b0f135916
- ARN:** arn:aws:workmail-us-east-1:491085397121:organization/m-d63a4182d5ac4784b3aeff4b0f135916
- State:** Active
- Date created:** April 27, 2025 at 18:35 (UTC+5:30)
- Default domain:** madhu124.awsapps.com
- Directory type:** WorkMail directory
- Directory ID:** d-906631128a

Below the details, there is a 'User login' section with links for 'Desktop or mobile apps' and 'Amazon WorkMail web application' (https://madhu124.awsapps.com/mail).

STEP 11-> Login into the amazon workmail.

The screenshot shows the Amazon WorkMail web application interface. The left sidebar lists folders: My Mail, Inbox, Junk Email, Outbox, Drafts, Sent Items, Deleted Items, and RSS Feeds. The main content area shows the 'Inbox' with a search bar and a message list. The message list is currently empty, displaying 'There are no items to show in this view'.

STEP 12-> The inbox opens which implies that the workmail is successfully created.

The screenshot shows the Amazon WorkMail web application interface with an email loaded in the inbox. The email is from 'MADHUSREE KAR _141' and is dated 'Today, 6:47 pm'. The email content is as follows:

From: MADHUSREE KAR _141
Re: [No subject]
To: Madhusree Kar
Hiw
On Sun, 27 Apr, 2025, 6:45 pm Madhusree Kar, <madhu@madhu124.awsapps.com> wrote:
